

Swemco pools

Tips on water saving and keeping your pool full

Do not backwash more than necessary

Cover your swimming pool

Harvest rain water, dew and mist

Regain and reuse your backwash water with our backwash tank

It has been calculated that one millimeter of rain on one square meter of roof yields one liter of water. In one wet season, this is a vast amount of water from an entirely natural and free resource!

Backwash Tanks

We also supply and install water storage tanks of various sizes

Water Storage Tanks
